

Fact Sheet – August 2021

Tropical Gold Mines is a Canadian-focused gold exploration company strategically positioned in three prolific mining regions: James Bay, Quebec; the Kitikmeot Region Nunavut; and the Golden Triangle, British Columbia. Our vision is to deliver shareholder value by aggressively growing our multi-million ounce gold portfolio through additional significant gold discoveries in Canada.

Why Invest?

Proven team
with actionable knowledge
and experience

Growth assets
adding gold ounces to grow
current resources

High-grade gold
low risk exploration
strategies in stable
jurisdictions

New discovery
active with 55,000m+
of drilling planned over
18-month period

Upcoming Events

- Precious Metals Summit - September 8-11, 2021
- Gold Forms America - September 12-15, 2021
- GCFF Resource Investment Conference - September 23, 2021

Recent News

Tropical recently released results for eight drill holes at the Eau Claire project located in the James Bay region of Quebec, including results from the Company's deposit drilling and initial results from the western extension targets. Three

of the drill holes focused on the previously untested Hinge target at the western limit of the Eau Claire deposit. Significant intercepts included 1.0 metre (m) of 12.81 g/t gold and 8.0m of 1.18g/t gold, demonstrating that the Hinge target has both high-grade veins and broader zones of mineralization.

The company is currently drilling to explore and expand upon the Snake Lake mineralized system, where the Company has successfully delineated high-grade mineralization on step outs of up to 850m where 0.5m of 94.1 g/t gold was intersected (see news release dated May 18, 2021). The second drill is currently testing the western Limb extension target where the Company is drilling veining and alteration consistent with that found within the Eau Claire resource.

Our Projects

Eau Claire

Ownership: 100%
Location: James Bay Region, Quebec
Stage: Advanced exploration (PEA level)
Resources: Measured & Indicated - 808k oz @ 6.65 g/t Au
1: Inferred - 458k oz @ 7.48 g/t Au
50,000m+ of drilling to expand beyond PEA limits

Committee Bay

Ownership: 100%
Location: Kitikmeot District, Nunavut
Stage: Exploration (NI 43-101 resource level)
Resources: Indicated - 524k oz at 7.85 g/t Au
3: Inferred - 720k oz at 7.64 g/t Au
A potential 5,000-metre drill program to expand the
2021 Plan: Three Bluffs deposit and to test the Raven target

Homestake Ridge

Ownership: 100%
Location: Golden Triangle, British Columbia
Stage: Advanced exploration (PEA level)
Resources: Indicated - 156k oz @ 8.18 g/t Au & 1.7M oz @ 90.5 g/t Ag
2: Inferred - 734k oz @ 5.52 g/t Au & 15.8 oz @ 118.6 g/t Ag
